

Record of Information/Insights Gained and Applied

Resource materials are only as good as they can be when they become integrated with your own knowledge, experience and behavior. In an effort to make the most of the precious time you give to reading and reviewing video materials, I have provided a checklist to guide you in noting the most important points as you go along.

Use one page per chapter or section, recording all the requested information for that section. You may find you need to use more space than each box allows so you can always add a page or write on the back, but please try to make the main points concise enough to see at a glance.

Keep a binder with these notes in order as you complete each resource. It will be easy then to flip through to remind yourself of important points you have learned and when you began to incorporate this knowledge into your life.

May you be blessed as you continue to mature and grow into a likeness of our Messiah, Yeshua of Nazareth.
